

NEVIN GABRIEL PREQUENCIA

Full-Stack Developer

Malaybalay, Northern Mindanao, Philippines | gabrielnevin@gmail.com | 09268960194 | linkedin.com/in/nevingabriel

SUMMARY

Full-Stack Developer specializing in building modern web applications using React, TypeScript, JavaScript, Node.js, and Express.js. Experienced across the full application lifecycle, including frontend development, backend services, API integration, databases, cloud platforms, CI/CD, and production support.

Experienced in developing systems involving real-time communication and messaging using MQTT, as well as using Redis for caching, messaging, and backend application workflows. Experienced with multiple cloud platforms including Microsoft Azure and Google Cloud Platform (GCP), including cloud-based application deployment and CI/CD workflows.

Also experienced in mobile application development using React Native, allowing development across both web and mobile platforms. Has hands-on experience building AI-powered applications, including LLM integration, prompt engineering, and tool-calling agent workflows using the Vercel AI SDK. Adaptable across different libraries, frameworks, and technologies based on project requirements.

EDUCATION

Bukidnon State University — Malaybalay, Bukidnon

Bachelor of Science in Information Technology, 2018

EXPERIENCE

Full-Stack Developer

MeldCX — Cagayan de Oro City, Philippines | April 2021 – Present

- Developed and maintained full-stack web applications using React, TypeScript, JavaScript, Node.js, and Express.js, building reusable frontend components, backend services, and APIs based on business and technical requirements.
- Worked across the full application lifecycle, including frontend and backend development, API integration, databases, cloud deployment, CI/CD, and production support.
- Developed and integrated MQTT-based communication for applications involving real-time device and system data.
- Worked with Redis for backend application workflows, caching, and efficient handling of frequently accessed or transient data.
- Worked with multiple cloud platforms, particularly Microsoft Azure and Google Cloud Platform (GCP), supporting cloud-based applications, hosting, data processing, messaging, and system integrations.
- Implemented and maintained CI/CD pipelines and automated deployment workflows to streamline application builds, testing, and releases.
- Developed new features and enhancements for existing applications while contributing to technical design, application architecture, and database integration.
- Investigated and resolved production issues through troubleshooting, debugging, and root-cause analysis.
- Collaborated with clients, project managers, and developers to translate requirements into practical technical solutions, adapting across different libraries, frameworks, and technologies as needed.

Mobile Software Developer

Agila Innovation — Cagayan de Oro City, Philippines | March 2018 – February 2021

- Developed and maintained mobile applications using React Native.
- Analyzed requirements and designed, developed, and implemented mobile software applications.
- Built application features and user interfaces for mobile platforms.
- Tested applications and performed troubleshooting prior to deployment.
- Collaborated with developers and performance engineers to improve application supportability and performance.
- Identified performance bottlenecks and contributed to improving application performance.

Intern — Quality Assurance Engineer

NEC Telecom — Cebu City, Philippines | October 2017 – March 2018

- Wrote and optimized test cases to support thorough and consistent manual software testing.
- Performed software testing to identify functional issues and verify application behavior.
- Produced and maintained technical documentation.
- Proposed improvements to development and testing processes to improve usability, functionality, and performance.

TECHNICAL SKILLS

Frontend Development: React, Next.js, TypeScript, JavaScript, HTML, CSS, Vite

Backend Development: Node.js, Express.js, Hapi.js, REST APIs, GraphQL

AI Development: LLM Integration (OpenAI, Anthropic Claude, Vercel AI SDK), Prompt Engineering, AI Agent Development, Cursor, Co-Pilot

Real-Time & Messaging: MQTT, Redis, Pub/Sub

Databases & Data Platforms: SQL, PostgreSQL, MongoDB, Firebase, Snowflake, Databricks

Cloud & Infrastructure: Microsoft Azure, Google Cloud Platform (GCP), AWS, DigitalOcean

CI/CD & Tools: CI/CD Pipelines, Automated Deployment, Git, SVN

Mobile & Data: React Native, Xcode, Android Studio, Python
